

hello Nicolas

His letter is about my favourite subject.
My favourite subject is P.E.
You saw our teacher in Spain.

Mr. Diebel is very nice and friendly.
He is very friendly and he is P.E.
My favourite thing to do in P.E. is

Softball, I really like it because I am

good at it.

I like to home runs against my

classmates and I compete against my

I of my classmates has a gift the most competition with me, in home runs in the competition is who who hits the most competition

the school year.

I am currently winning

see by next year

Face America

My Favourite Subjects:

Dear Elena, it's funny to write to you again! I really liked Luarca and now I know who I'm writing to.

I hope you're well, I'll explain you my favourite subjects: We do a lot of experiments and we discuss many things. Currently we are working on a poster project about energy in your cells. How we use it and where we get it from.

History → I really like history, it's great to imagine how people thought and lived in the old days.

It's very easy for me and my grades are very good. Physics → physics is fun but very difficult for me, my grades are okay, very average.

Greek → Greek is difficult for me but I do like it, you have a different alphabet and your name is written like this: Έλσα and my name is: Έλσα Έλσα Έλσα

English → it's very easy because every subject except the languages are written and taught in English

French → I really like French because I think it's a beautiful language. It is the most romantic language of the world.

P.E + drawing → Everyone likes these subjects and I do too. Dutch of course too and it's easy too.

Subjects I hate

German → I hate it, it's a very ugly language and I dislike it.

Geography → It's so boring, I really don't care how the Alps were formed or how tall the Mont Blanc is.

The other subjects → Latin, handwriting, Music are not worth explaining (lots of love too) Bye Bye! Emma Lisa

my favorite subject

Hello Julia,

In this letter I have to talk about my favorite subject. My favorite subjects are the drawing and handicraft lessons. I like those lessons because I don't have to learn for them, but especially because I can be creative. I really like to draw at home too, but I am not good at it.

I don't really now what to talk about anymore so I am going to talk about the worse subject.

For me the worse subject is Geography, because the lessons are very boring, but there is a nice thing about geography: we (the students) talk a lot during the lessons and that is quite nice, but not for the teacher.

Now my paper still isn't full so I am going to talk about the subject I am not good at.

Well I am not good at biology, I really am not. I can learn so much, but I still get an insignificant. It is quite funny because I can start learning 2 weeks before a test and still get a bad grade.

This was my school subject letter ~~thing~~ and I think I am finished with writing.

Amora

Hello Lara!

This next letter is about my favourite subject in school. But first I want to thank you, because I had a very nice time in Spain. I love Luarca and I miss you! 

In Luarca I told you I don't like math. It's my worst subject and I am very bad at it! I also don't like sports, because I am very slow. But I like art class, there I can sit and laugh with my friends. I always sit with Ambra and

sometimes with Michelle! English, Dutch and German are my favourite languages, because I understand everything really well. It's sad there are no Spanish classes, because I think Spanish is beautiful and I would like to learn it. There are of

course a lot more subjects, ~~but~~ but I don't like all of them. In The Netherlands, schools try to make lessons as fun as possible. So sometimes we have special projects in class like translating a song and presenting it to your classmates! I think

going to school is nice, but you have to work hard and your homework. So boring! But seeing my friends everyday is really nice, because we don't live close together like your friends in Luarca. I hope this was enough information, now I'm going to read

your letter! Bye and see you later!

Miss you 
Olivia

Tell your friends I said hello 

Hey Sara!

In this letter I'm going to talk about my favourite subjects.

My favourite subjects are: Biology and Latin. I really like Biology because I think it is an interesting subject and the teacher is very nice. For Latin I think the same.

My least favourite subjects are Greek and Geography. I find these two subjects very difficult and that's why I dislike the subjects, if they would be less difficult I might like them.

I think that I'm going to be a doctor later because I'm ~~chose~~ going to choose to study Biology and Latin. I don't care about how hard it is, I love Biology and Latin and I will do everything to be a doctor.

We don't have all the subjects yet here in my class year. In the third year we will get more subjects so maybe my favourite subjects will change, maybe even my career dream. We will see.

This is my letter of my favourite subject. I'm looking forward to your letter! It was really nice meeting you in Spain, I loved it :)

Till next time,
xxx Michelle

Kind regards Victor

hello I'm writing you again.
today I'm writing about my favorite Subject on
School, that is gymnastics, I like gymnastics the
most because in that lesson we don't have to sit
in a chair. and there we can play sports
and games. I like bad games the most.
on our school we have 4 rooms where you
can play gymnastics.
in my free time I play Rugby as a hobby, I plays
this sport 3 times a week

Hallo Rueden

This letter is about my favourite subject
My favourite subject is sports

I like sports because I like being active.
And I play football myself

Another subject I like is music, because I
play keyboard myself.

I also like biology, because we do
a lot of experiments and I like animals
and nature.

In summer we play different sports outside
for example: football, basket ball, hand
ball and a lot more.

With music we learn to play different
songs, I also practise these songs at
home

This was my letter about my favourite
subjects

I look forward seeing you again next
year

From your Dutch partner, Bas Schaffer

Hey Alejandra,

I really love staying with you, I really miss it. Juarez is beautiful. This letter has to be about our favourite subjects, well mine ^{are} maths & sports. I can't do math, I'm terrible at it but I live to do it. Sports, I know you don't like it, and I'm not good at it but it can be really fun. I don't

know anything more to say about those subjects so I'll talk about the other subjects. Music, it's alright but boring because we don't really learn anything. Dutch is stupid, why would we have to learn our native language? Geography is nice because you can talk during the lessons without the teacher noticing.

It. German is easy because dutch words are sometimes similar to it, ~~and~~ ^{and} I speak a type of dutch that is a mixture between German and Dutch. English is nice, but our teacher is sick so our lessons are canceled. I'm not very good at Biology but we have to examine blood types and look at organs of pigs and cut them open so I'm not really fond of it. I do like drawing and handicrafts though, but the assignments are stupid.

French is one of my least favourite subjects, I hate it. Physics is fun because we do a lot of practical. History is funny because we have to read a meeting of the French States General & we wear costumes and wigs. I can't wait until you come here, it's in May so I hope the weather will be nice, we can go to the cinema or get ice cream or go to the Mac donalds but I can't plan ahead we'll see what you and the rest will want to do.

Can you say Hi and thank you again to your parents for me? I miss you,

Meg

Hey Lucia

My favourite subjects are drawing and handy crafts

These subjects are fun, and aren't boring.

In the lessons we get a subject and a deadline to make something. We always get a few weeks to make a sketch, and then a final work.

We have handy crafts once a week and drawing also once a week. For example we have to make in pairs a chair and lamp in handy crafts but not just a small thing. And in the drawing lessons we have to make 2 posters for the chair and the lamp to "sell" it. I like the drawing and handy crafts lessons because I can be creative and the lessons are kind of fun.

Miss you and can't wait to read your letter.
Bye!

Amazilia Akonem

* The first pin is the logo of the Dutch Royal family. it's orange because that's the colour of the Netherlands. It is a crown because we have a monarchy.

* These are little flags in the colour of the Dutch national flag (red, white, blue). Orange is also the colour of the Netherlands because our football players wear orange during their games.

* The last pin is a bike which is typical Dutch because Dutch people cycle a lot. After China we have the most bikes in the world.

* The first pin is the national flag of the Netherlands.

† The second pin is a tulip, these are very common flowers in the Netherlands

† The third pin is a windmill. In the past these were used to grind grain to produce flour. Only a few windmills keep doing this.
