

Hello Margysia,
How are you?

In this letter I have to tell you what my favourite subjects

are.
So... one of my favourite subjects is Physical Education (P.E.)

I have this subject twice a week: on Wednesday and on Friday.

We play sports like basketball, volleyball, hockey and more.

When we are outside on the grass we also play sports like

softball and beach volleyball. I do think that the lessons are

a bit short... but overall it's a really fun class with a funny teacher.

Another favourite subject would be French. This subject I have

on Wednesdays and Thursdays. What I like about the subject

is that you can recognize all kinds of words from Latin and English.

In my opinion I think it's a beautiful language and I would love

to speak it fluently.

I'm really curious about how classes will be like in Poland!

Lots of love,
Nanna

Pen Pal letter 3: favourite subjects.

Hello,

In this letter I'm going to talk about my favourite subjects. I like a lot of them, like Greek, Physical education, drawing.

But my favourites are physics and math. I like physics a lot, because we have

let's start with physics. I like physics a lot, because we talk about very interesting things. a very fun teacher. Also because we talk about very interesting things. you can

like the first moon landing, space, gravity. ~~you~~ With physics you can be very interested in space. When

really find out how things work. I'm very interested in space. When I was young I wanted to become an astronaut. I'm very interested in space. When

I dressed as an astronaut. The only disadvantage of physics is that we get a lot of homework and it can be quite difficult.

As I said, my other favourite subject is math. I really like working with numbers and formulas. But I don't like measuring.

My favourite chapter that we had was previous year. It was working with brackets and squared numbers. $10^3 + 9561 = 9$

working with brackets and squared numbers. $10^3 + 9561 = 9$ An example: $(2+8) = 5 + (10^3 + 9561) = 9$ if for me!

You can calculate it for me! My favourite subjects, what are yours?

These were my favourite subjects, what are yours?

Let me know.

Bye, Sjb Groups

PS: I know I can't draw & (drawing skills on point)

Poland

geography

XXX Anna

My favorite subject is gym (PE), because I live to sport. In this class we do different kinds of sports and exercises.
The subject that I don't like at all is geography.
I think that is really boring.
I don't know what to say now so bye &

pen pal letter 3 favorite subject

Hey!

Hey Peter

This letter is about my favourite subjects at school which are PE/sports, music and biology.

PE / Sports

I like this subject, because I'm a very active person, I train

3 times a week, but now about the subject. We play a lot of different sports, for example football or basketball.

Music

I like this subject, because I

play the piano a lot and I love music. In class we play music or we have theory, I prefer playing.

Biology

This is one of my favourite subjects, because I think it is interesting to know how your body works.

Raf

What are your favourite subjects?

Hey Maja!

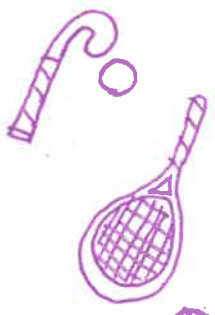

Roermond, March 17th 2019

It's nice to meet you, at least I know who I'm writing my letter to now. I really liked your letter, lets just say that I almost screamed when I read that you like Queen, Harry Styles, the 1975 and Arctic Monkeys. I'm actually listening to the 1975 now. I'm listening to "I couldn't be there in love". Maybe you would like the band "Weathers", they are a small band but I really like them. What I'm going to say might escapoint you. I don't like reading. I like watching movies and series more. The walking dead was recently added to netflix and I'm at season 3 now. The Umbrella Academy is great too little tip, try to play the ukulele again, in a few years you will regret it. So if you needed a sign to start again, let this be your sign. Baking is something I love to do as well, on Thursday it was J(pie) day (3.14), so I baked a cake for the ~~class~~ class. We ate it during the maths lesson. My favorite cake is are brownies as well. ~~They~~ They are just so good. I like learning new things, so I don't mind school. Sometimes the homework gets annoying but hey, that's the price you pay for a nice job later. One of my favorite subjects is Physics. It's fun to learn about the world and even ~~rather~~ outer space. I always want to know how things work and Physics explains alot. I also like P.E, it's nice to learn a new sport. I do hate gymnastics though. The nice thing about P.E. is that my teacher with sometimes let

in this letter I'm going to tell you what my favorite subject is and which subject I rate the most.

Period letter-3
Favorite subject

My favorite subject is Gym (PE).
I like it because I love to play sports
(for example: Hockey, tennis and football)

The sports I play are hockey & tennis and I really like them.
In our PE lessons we play sort of sport a couple of lessons

We are now playing hockey.

If I need to choose a subject in which you learn something I would choose Biology
I like it because we do nice things in class (like finding out which blood group someone has and cutting a heart open)

The subject I rate the most is Geography.
I just think that we don't need it and it is just boring because the paragraphs are also boring.

I hope you know what I like and don't like

XOXO Jamiek

If you want to add my on vsta or sp snap:

Snap: jamiekoelen

Vsta: jamiekoel04

I have 28 lessons per week. I do 10 which in dutch
is: twee talig onderwijs which means that all my
lessons (except for: french, german and dutch) are
in english. The rest of my class also has a great
and lot in but I chose not to because I am not good
at learning languages, ~~except~~ for english because I
watch a lot of tv in english with english
subtitles.

My favorite subjects are Hand-crafting, maths and
physics. I like hand-crafting because I can really focus
when I am making an "Art" work. I like maths
because when you know the right formula and you
know the way you can figure something out, it is
something I sometimes do for fun.
I like physics because you can really get an answer
to every question you might have. I have got a lot of
questions in physics because I am a very curious
person.

The lessons that I have are: Physics, English, German,
French, biology, History, Geography, Maths, Music, Drawing,
Hand-crafting, Fina (English Alkion) and PE lessons.

I didn't go to Spain. I'm just going to Poland.
But the people in my class that went to Spain said that
they don't cycle and most of the people in Spain don't
even own a bike.

Lisa
Ps: My number is: +31-6-12967771

* The first pin is the logo of the Dutch Royal family. it's orange because that's the colour of the Netherlands. It is a crown because we have a monarchy.

* These are little flags in the colour of the Dutch national flag. (red, white, blue). Orange is also the colour of the Netherlands because our football players wear orange during their games.

* The last pin is a bike which is typical Dutch because Dutch people cycle a lot. After China we have the most bikes in the world.

* The first pin is the national flag of the Netherlands.

† The second pin is a tulip, these are very common flowers in the Netherlands

‡ The third pin is a windmill. In the past these were used to grind grain to produce flour. Only a few windmills keep doing this.
