

WE ARE THE FUTURE

- You are the members of a new German/European political party. You want to improve your country's cultural and ethnic integration issues.
- Decide which measures should be taken and or which policies should be changed / improved.
- Which issues/problems does Germany have concerning the integration of other minorities/cultures? Name as many as you can or know.
- Take into account aspects such as assimilation, multiculturalism and interculturalism among others.
- Think of the different spheres of life where a higher degree of integration should be needed for example housing or education, to mention a few.
- If you run out of ideas take a look at your vocabulary tests/lists, your mind maps on *What can we learn from other cultures* and *What can other cultures learn from us*, as well as at the excerpt from *Interculturalism* by Michael Emerson and the different cases presented in his paper.
- To create your policies remember:

- Your policies should take into account infrastructure, the societal concept of give and take and, if possible, it should be applicable to different fields (multi-purpose/inclusive policies).
- Present your results to the other political parties. For your presentation:
 - Choose an appealing name for your political party.
 - Research on different models of integration used in different countries.
 - A clear and visual power point presentation will be necessary to convince the other political parties.
 - Use statistics/graphics and pictures to illustrate and back up the statements in your presentation.
 - Each member of the party must present one policy.
